

MUKESH T S

Driven by the desire to developing performant, accessible games using Unity, WebGL, etc. Committed to learning new technologies and methodologies to improve the game development process.

Skills

CSharp

ASP.NET MVC

Prisma

Entity Framework

Unity

TypeScript

React

MongoDB

CSS-Flex

Experience

Junior Software Engineer, Express, TypeScript, ASP.NET, Entity Framework, LINQ
Cognizant Technology Solutions, Hyderabad From Dec 2023

- Demonstrated expertise in CSharp and ASP.Net by creating a POC GoContacts, which as features like user authentication, users can manage and organise contacts, etc during my training peroid.
- Then joined project Agero Inc where I actively participated in code reviews, understanding the coding standard and best practices.
- Implemented minor enhancement in project code to improve functionality and meet client expectations mentioned in JIRA ticketing tool which included fixing bugs, improvement in processing excel files, etc.
- Participate in scrum meeting and other meeting like walk through meeting dividing tasks for sprints.
- Maintain uptime and manage the of our APIs in AWS by creating auto-scaling rule, terminating degraded servers, configuring On-call in PagerDuty.
- Create monitors and Dashboards for our application for overall observability using Terraform.
- Coordinated with support team to find and fix the bugs in the application.
- Document the APIs and error triaging process for other teams.
- Participated in Retrospective meetings.

Frontend Developer, JavaScript, HTML, Tailwind, Shopify
Marmeto Enabling Commerce, HSR Layout Jul 2023 - Nov 2023

- Completed training on Frontend development and developed POC mukesh-ts-store (pass: sE cure). In which all the expected page like product page, collection page, etc was developed using design reference.
- Fixed bugs related in many stores which includes MTR, Cycle, OrientElectric.

Address

Bengaluru, Karnataka, India

Education

Jul 2019 - Jun 2023

B.E in Electronics and Communication Engineering 7.2 CGPA
Global Academy of Technology (VTU)

Jun 2017 - Apr 2019

PUB in PCMB 72.4 %
PES PU College

Jun 2007 - Apr 2017

School 10 CGPA
St. Paul's School (CBSE)

Technologies

- GIT
- Visual Studio 2022
- Shell / Bash
- Linux
- AWS Basic

Language

Kannada English

Hindi Telugu

- The bug fix includes fixes in API usage, alignment issue, implementing responsiveness, etc.
- Engaged with client and understood the client requirement for Virgio store, and developed home page and implemented a parallax scroll feature on home page but was removed later due to unexpected experience.
- Responsible for the whole store of Knot Homes, where I was the lead developer in the team of 2 and implemented the Product Details Page.
- Analysed and did planning for the tasks allocated to me in Monday-Day board and tracked and evaluated the time taken for the tasks.

Projects/Work

- Solved 250+ DSA problems on LeetCode and GeeksForGeeks across following topics arrays, strings, binary search, bit manipulation, linked-list, recursion, stack and queues, sliding window, two-pointers.
- **DrawInSync**(InProgress): A personal project in progress, a collaborative webapp where multiple users can draw on same board simultaneously. Using technologies NextJS, Express, Postgrese (Prisma), WebSocket, TurboRepo, TailwindCSS, Zod.
- **Brainsily**(Deployed): A personal project, notes keeping app for organizing and accessing your favorite content. Manage your content of types like (Tweet, YouTube, Text) and share it publicly. Used Node.js, TypeScript, React, Mongoose, Zod, etc.
- **SkillSchool**: Developed a basic backend using MERN similar to Udemy with instructors and student role, where the instructors can create and publish courses(course content not handled by SkillSchool) and student and purchase them. Used JavaScript, Mongoose, JWT, etc.
- **GoContacts**: At Cognizant I developed GoContacts, which offers managing contacts in a modern web environment. GoContacts is a dynamic Web Application developed with ASP.NET MVC 5, Entity Framework, and LINQ, utilizing MS SQL Server as database. The application empowers users to efficiently store, edit, and categorize contacts using customizable Labels. BS5 for UI, Identity Framework for user and Visual Studio 2022.
- **Knot Homes**(Company): At Marmeto, I was responsible for the product details page which I implemented using JavaScript, including price updates, image changes, and add to cart functionality.
- **Virgio**(Company): At Marmeto, I was assigned the task of designing the home page for Virgio. I leveraged tailwind to create a responsive and visually appealing sections/components and layout.
