Professional Summary

Full Stack Engineer with 2+ years of experience building scalable backend systems and internal tools using Node.js, TypeScript, and PostgreSQL. Experienced in designing data models, implementing validation systems, and optimizing application performance for real-world use cases.

Built and maintained ERP modules and automation systems that improved operational efficiency with strong focus on writing maintainable code, solving complex backend problems, and improving observability using tools like Redis, Datadog, and structured logging.

Worked across the stack with React, while primarily focused on backend architecture, APIs, system design, performance, and building scalable, production-ready applications.

EXPERIENCE

Full Stack Developer

Apr 2025 – Present

WebSpruce Software Solutions

Bengaluru, Karnataka

- Led development of an internal tool (ENFA) using Node.js, TypeScript, PostgreSQL (Drizzle), Redis, and React, focusing on scalable backend architecture and maintainable system design.
- Built a dynamic fee management system handling complex fee structures and payment tracking, improving operational efficiency.
- Developed a configurable exam module supporting scheduling, attendance tracking, and marks processing with Excel/PDF exports, reducing manual effort by 2–3 hours per week.
- Implemented dynamic form handling and validation logic to support flexible field configurations and runtime validation requirements.
- Built frontend interfaces using React, React Query, and Tailwind/MUI for dashboards and administrative workflows.

Junior Software Engineer

Dec 2023 – Mar 2025

Cognizant Technology Solutions

Coimbatore, Tamil Nadu

- Built automation scripts to process and transform Excel data, reducing manual effort by 2–3 hours per employee weekly.
- Designed observability dashboards and alerts using Datadog and Splunk, improving system visibility and reducing fault identification time by ~70%.
- Developed monitoring queries, and alerting rules using Terraform and logging formats to enhance incident detection and response.

PROJECTS

DrawInSync | *NextJS, Express, WebSockets, PostgreSQL, Docker*

In Progress

- A real-time collaborative drawing platform enabling multiple users to draw on a shared canvas simultaneously by interactive drawing using WebSockets, implemented with HTML5 Canvas APIs.
- Designed backend services to handle concurrent updates and ensure state synchronization across clients.

TSM Lifestyle | *JavaScript, HTML, Tailwind, Shopify Liquid* Live (pass: sEcurE)

Jul 2023 – Aug 2023

- Developed a custom e-commerce storefront with product listings, collections, and dynamic product views.
- Implemented client-side logic for variant selection, price updates, filtering, and add-to-cart workflows using JavaScript.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL

Backend: Node.js, Hono, Express, REST API Design

Frontend: React, React Query, RHF, Tailwind CSS, Shadcn

Databases: PostgreSQL, MongoDB

Tools & Technologies: Redis, Docker, Git, Terraform, Datadog, Splunk

Other: WebSockets, Zod, Problem Solving

EDUCATION

B.E in Electronics and Communication Engineering

Global Academy of Technology (VTU), Bengaluru

Jul 2019 – Jun 2023
