PROFESSIONAL SUMMARY

Full Stack Engineer with 2+ years of experience building backend systems, admin dashboards, ERP modules, automation tools, and e-commerce workflows using Node.js, TypeScript, React, PostgreSQL, MongoDB, and Redis. Comfortable across API design, data modeling, validation, reporting, observability, and responsive frontend implementation.

EXPERIENCE

Full Stack Developer

WebSpruce Software Solutions

Apr 2025 – Present

Bengaluru, Karnataka

School/College ERP Platform

Node.js, Express, MongoDB, React, React Native

- Built ERP modules for fee collection, marks, attendance, reports, SMS communication, tasks, notifications, and role permissions across Node.js/Express/MongoDB backends and React/React Native frontends.
- Implemented fee, receipt, deleted-receipt audit, marks, exam, and attendance workflows with PDF/Excel exports using Puppeteer, Handlebars, ExcelJS, MongoDB aggregation, and bulkWrite updates.
- Developed React admin interfaces with React Query, Tailwind CSS, Material UI, Formik/Yup, protected routes, filters, file uploads, loading states, and report download actions.

Note For Approval Workflow System

Hono, TypeScript, PostgreSQL, Drizzle, Zod, React

- Built an internal NFA approval workflow using Hono, TypeScript, PostgreSQL, Drizzle ORM, Redis, Zod, React/Vite, TanStack Query/Table, React Hook Form, dnd-kit, and LexoRank.
- Implemented dynamic request-detail forms, runtime validation, member-management workflows, cursor pagination, reusable API wrappers, and typed table/list components.
- Added creator-owned member actions and approver ordering flows with drag-and-drop UI and transaction-backed reorder logic.

Junior Software Engineer / L2 Support Engineer

Cognizant Technology Solutions

Dec 2023 – Mar 2025

Coimbatore, Tamil Nadu

Insurance Client Production Support

Splunk, Datadog, MySQL, JIRA

- Supported an insurance-domain client production application by triaging incidents using Splunk, Datadog, MySQL queries, JIRA tickets, and documented error-investigation workflows.
- Investigated service errors, user issues, data mismatches, and operational requests using log searches, request traces, SQL queries, timestamps, and support runbooks.
- Coordinated with support and development teams to reproduce defects, share logs/query outputs, validate fixes, and document API/error-triage processes.

Node.js Automation and Observability

Node.js, CSV/XLSX, Datadog, Splunk, YAML

- Built Node.js CLI scripts to process CSV/XLSX files and generate output files for recurring template workflows, reducing manual effort by 2-3 hours per employee weekly.
- Created Datadog/Splunk dashboards, saved searches, monitors, and alerts using YAML configuration files committed through GitHub and applied by automated workflows, reducing fault-identification time by about 70%.

Frontend Intern

Marmeto Enabling Commerce

Jul 2023 – Nov 2023

Bengaluru, Karnataka

- Developed Shopify storefront pages and e-commerce workflows using Shopify Liquid, JavaScript, HTML, CSS, and Tailwind-style utility classes.
- Built a complete demo storefront with product listing, collection, product-detail, cart drawer, and responsive navigation workflows using a sample product catalog.
- Implemented product variant selection, dynamic price/image updates, add-to-cart behavior, and fixed API consumption, JavaScript interaction, layout, and responsiveness issues across client storefronts.

PROJECTS

DrawInSync | TypeScript, Next.js, Express, WebSockets, Prisma, PostgreSQL, JWT, Zod

In Progress

- Built a collaborative whiteboard monorepo with separate Next.js frontend, Express HTTP API, WebSocket server, shared Prisma client, and shared validation packages.
- Implemented authenticated board workflows and board-scoped real-time synchronization across JWT-authorized WebSocket connections.

Brainsily | React, TypeScript, Node.js, Express, MongoDB, Mongoose, JWT, Zod

Dec 2024

- Built a full-stack second-brain app for saving, filtering, deleting, and sharing notes, links, tweets, and YouTube videos.
- Implemented JWT-protected Express APIs, Zod validation, Mongoose models, owner-scoped CRUD, encrypted public share links, and a responsive React dashboard.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, C++

Backend: Node.js, Hono, Express.js, REST APIs, WebSockets, JWT, Zod

Frontend: React, Next.js, React Query, React Hook Form, Tailwind CSS, Material UI, shadcn/ui, Shopify Liquid

Databases: PostgreSQL, MongoDB, MySQL, Prisma, Drizzle ORM, Mongoose

Tools: Redis, Docker, Git, Datadog, Splunk, GitHub Actions, YAML, Puppeteer, ExcelJS

Problem Solving: 300+ DSA problems solved across LeetCode/GFG; arrays, strings, binary search, two pointers, stacks/queues, trees, graphs, DP, greedy

EDUCATION

B.E. in Electronics and Communication Engineering

Jul 2019 – Jun 2023

Global Academy of Technology (VTU), Bengaluru
