

Mukesh T S

Full Stack / Backend JavaScript Developer

+91 9481986729 | tsmukesh51@outlook.com | linkedin.com/in/tsmukesh51 | github.com/tsMukesh51

Professional Summary

Full Stack / Backend JavaScript Developer with 2+ years of experience building production ERP modules, internal workflow tools, backend APIs, and automation using Node.js, TypeScript, Express, Hono, React, MongoDB, PostgreSQL, and Redis. Strong hands-on experience with REST APIs, data modeling, request validation, role-based permissions, PDF/Excel reporting, observability, WebSocket prototypes, and SQL-backed production investigations.

Technical Skills

Languages: TypeScript, JavaScript, SQL, C#

Backend: Node.js, Express.js, Hono, REST APIs, JWT, RBAC, Zod, WebSockets, Redis, CSV/XLSX automation

Databases: PostgreSQL, Drizzle ORM, Prisma, MongoDB, Mongoose, MySQL, SQL Server

Frontend: React, Next.js, React Native, Vite, React Query, React Hook Form, Formik, Yup, Tailwind CSS, Material UI

Tools: Git, Docker, Datadog, Splunk, JIRA, Terraform, Puppeteer, Handlebars, ExcelJS

Problem Solving: Solved 300+ DSA problems across LeetCode and GeeksforGeeks

Experience

WebSpruce Software Solutions - Full Stack Developer

Bengaluru, Karnataka | Apr 2025 - Present

- Delivered full-stack school/college ERP workflows using Node.js, Express.js, MongoDB, Mongoose, React, and React Native across fee management, marks/reporting, attendance, SMS communication, role permissions, campus availability, tasks, and notifications.
- Built fee collection, receipt generation, deleted-receipt audit history, finance dashboards, and Excel/PDF reporting flows using MongoDB queries, aggregation pipelines, Puppeteer, Handlebars, and ExcelJS.
- Developed academic marks and exam workflows including marks entry, bulk updates, Excel import/export, progress reports, hall tickets, subject analytics, teacher-level authorization, and report downloads.
- Improved data-heavy ERP operations using MongoDB aggregation, bulkWrite upserts, targeted server-side filters, and concurrent lookup patterns for marks, fee, attendance, and reporting workflows.
- Integrated JWT/RBAC permission flows across backend middleware, role/module definitions, protected React routes, menu visibility checks, and reusable frontend permission components.
- Built SMS communication workflows with outbound provider REST calls and inbound delivery-status webhooks for credential messages, bulk SMS, attendance alerts, reports, failed-message retry, and provider status reconciliation.
- Built a TypeScript Note For Approval workflow system using Hono, PostgreSQL, Drizzle ORM, Zod, React/Vite, TanStack Query/Table, React Hook Form, dnd-kit, and LexoRank.
- Modeled approval workflow entities and APIs for templates, dynamic fields, request details, members, clarifications, edit history, cursor pagination, typed validation contracts, dynamic forms, creator-only permissions, and transaction-backed approver reordering.

Cognizant Technology Solutions - Junior Software Engineer / L2 Support Engineer

Coimbatore, Tamil Nadu | Dec 2023 - Mar 2025

- Supported an insurance-domain client production application by triaging incidents, service errors, user issues, data mismatches, and operational requests using Splunk, Datadog, MySQL, JIRA, and documented troubleshooting workflows.
- Built terminal-run Node.js CLI scripts to process CSV/XLSX files and generate output files for recurring template workflows, reducing manual effort by 2-3 hours per employee weekly.
- Created Datadog/Splunk dashboards, saved searches, monitors, and alerts using YAML configuration files committed through GitHub and applied by automated workflows, reducing fault-identification time by about 70%.
- Wrote MySQL queries for production investigations and coordinated with support, development, and client-facing teams to reproduce issues, share logs/query outputs, validate fixes, and document API/error-triage flows.
- Completed .NET training and built GoContacts, an ASP.NET MVC contact-management application using Entity Framework, SQL Server, Razor views, LINQ, and ASP.NET Identity.

Marmeto Enabling Commerce - Frontend Intern

Bengaluru, Karnataka | Jul 2023 - Nov 2023

- Developed Shopify storefront pages and e-commerce workflows using Shopify Liquid, JavaScript, HTML, CSS, and Tailwind-style utility classes.
- Built a demo storefront with product listing, collection, product-detail, cart drawer, responsive navigation, variant selection, dynamic price/image updates, quantity handling, and add-to-cart workflows.
- Fixed API consumption, external API usage, JavaScript interaction, layout alignment, and responsiveness issues across multiple client Shopify storefronts.

Projects

DrawInSync - Real-Time Collaborative Whiteboard

TypeScript, Next.js, Express.js, WebSocket/ws, PostgreSQL, Prisma, NextAuth, JWT, Argon2, Zod, pnpm, Turborepo

- Built a TypeScript monorepo for a collaborative whiteboard with separate Next.js frontend, Express HTTP API, WebSocket service, shared Prisma client, and shared validation packages.
- Implemented Zod-validated auth APIs with Argon2 password hashing, JWT issuance, Prisma-backed user lookup/creation, NextAuth Credentials integration, and protected board APIs.
- Designed PostgreSQL/Prisma models for users, boards, collaborators, and drawable elements, then prototyped JWT-authorized WebSocket broadcasting with board-scoped connection groups and canvas drawing tools.

Brainsily - Full-Stack Second Brain App

Node.js, Express.js, TypeScript, MongoDB, Mongoose, JWT, Zod, React, Vite, React Router, Tailwind CSS

- Built a full-stack application for saving, organizing, filtering, and sharing notes, tweets, YouTube videos, and links using React, Node.js, Express, TypeScript, and MongoDB.
- Implemented JWT authentication, protected Express middleware, Zod validation, Mongoose schemas, owner-scoped content CRUD, encrypted public share links, reusable React hooks, modals, filters, and responsive dashboard UI.

Education

B.E. in Electronics and Communication Engineering

Global Academy of Technology (VTU), Bengaluru | Jul 2019 - Jun 2023
